

Front End Developer

Location: Kitchener, Ontario

Job Description - Full time, permanent

Experience: 5 years experience

About us:

ProNavigator is a venture-backed insurance technology company. Our team is made up of insurance industry veterans, technology experts, and data scientists who've come together to build solutions specifically for the insurance industry. ProNavigator's platform incorporates natural language processing and machine learning to improve access to information and automate workflows for customers, distribution partners and employees. This is a great opportunity to join a tight-knit, fast growing team to build an exceptional product.

Key Responsibilities:

- Build the core customer-facing features of the product
- Work closely with the team to deliver a quality user experience
- Write scalable, efficient and performant code
- Make an impact on the direction of the product and the company
- Make informed technical decisions with little supervision
- Work with the backend team to design and integrate with our API's
- Be able to iterate quickly, incorporating changes as a result of internal and customer feedback
- Perform design and code reviews
- Develop automated testing to ensure the quality of the code base
- Develop best practices in front-end development.

Required Skills and Qualifications:

- A strong foundation in web technologies: HTML5, CSS3, Javascript.
- Experience level proficiency with modern front-end frameworks, such as React (preferred), Vue or Polymer.
- Experience writing cross-browser web applications.
- Experience building accessibility web applications (WCAG 2.1).
- Experience with web performance analysis and techniques to make web applications fast.
- Comfortable working across the stack (front-end, server-side, database).
- Experience with Python and AWS.
- Experience with start-ups
